Dear Ahmed,

Thank you for your mail.
Replying point by point for sake of clarity.

1. All local interceptions are done within (System 1) and not through the cloud (System 2), as local interceptions are considered as internal affairs/matters. We may accept that the global interceptions are done through the cloud (System 2), but this remain as the higher authority final decision.
[Ex8] confirmed. As presented in the document, the proposed solution is comprises of 2 stand-alone systems (not connected to one each other) each with its own separate web access. As such, the system operator may choose which system to use at any given time, whereas local subscribers will be handled by default with system 1 (local/isolated system). Please note that some of the C3 subscribers will be accessed only by system 1 (in lack of roaming agreements with current cloud).
An additional thought, you can decide to use only System 1 as standard practice, whereas System 2 will be used only for troubleshooting to your sole discretion.
2. System 2 will never be connected to local ISPs or (System 1).
[Ex8] I assume you mean System 2 will never be connected to local telecom or System 1 ? if positive, confirmed.
In order to do so, we will need to load on server of System 1 the full GPS database for all 2G/3G/4G antennae within country as well as local maps so all local subscribers and foreigners within country will be covered without the need for any connection. Otherwise, we will need to use TOR or similar means to translate cell ID to GPS and show on

Since all of the numbers were unable to intercept, Ahmed Ali Alhebsi (SCNS ,UAE) provided another number which he was sure was in roaming. The number was 00447770753533.

[+447770753533](tel:+447770753533) - **Abdulaziz Alkhamis**, Editor-in-chief in Al Arab Newspaper (UK). Al Arab is Arabs first Arabic daily newspaper founded in London 1977.

Miroslav confirmed that the number is on roaming and currently located in Saudi Arabia. They intercept the calls of Abdulaziz Alkhamis for next 48 hours. After 2 days they recorded two outgoing calls which was on following numbers –

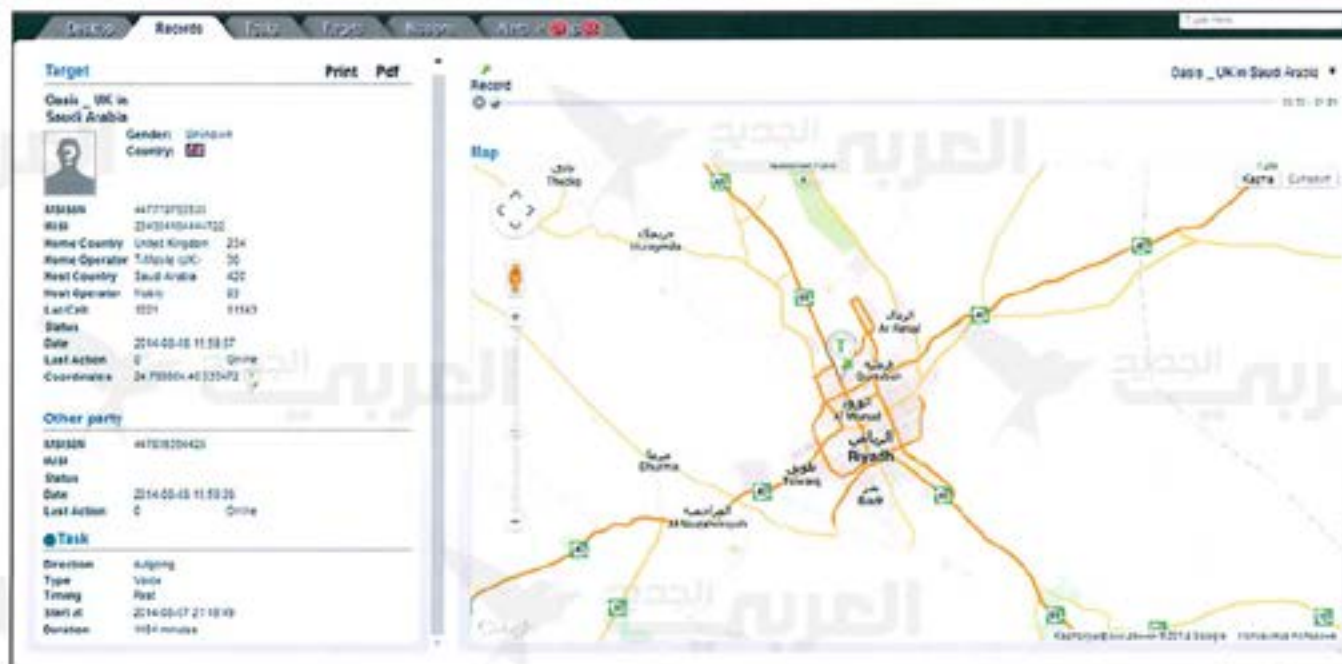

[+447508503899](tel:+447508503899) – Saleh from UK.

[+447836354428](tel:+447836354428) - المفتي محمد from UK - Mufti Mohammed.

Unfortunately the records were shared by different medium, so we were unable to locate the recordings of both the calls.

According to the screenshot which was shared by Miroslav the **number was located in Riyadh – Saudi Arabia** and following details were obtained:

- MSISDN – 447770753533
- IMSI – 23430410444722
- HOME OPERATOR/COUNTRY
- T-MOBILE (UK)
- HOST COUNTRY - SAUDI ARABIA
